

Students Evaluated Teachers of Chemical Engineering BA Program for Spring Semester 2023

In a bid to enhance the quality of education, the evaluation of teachers for Chemical Engineering BA program in the spring semester of 2023 was carried out by students. The results of this evaluation are now available for public viewing.

The decision to involve students in the evaluation process was made with the aim of providing them with an opportunity to express their opinions on the quality of education provided by the faculty. The students were asked to evaluate the performance of their teachers based on various parameters, including their teaching skills, communication abilities, and course content.

The results of the evaluation are expected to help the university administration identify areas for improvement and take appropriate measures to enhance the quality of education. Students who participated in the evaluation process expressed their satisfaction with the opportunity to have a say in the evaluation of their teachers and hoped that such initiatives would continue in the future.

Overall, the evaluation process was seen as a positive step towards ensuring that students receive quality education and that teachers are able to improve their teaching methods based on feedback from their students.
