

SUSTAINABLE PROCUREMENT POLICY

I. PHILOSOPHY OF THE POLICY

The sustainable procurement policy provides guidelines and resources for procurement of consumables, durable goods, and necessary additions and changes.

II. PROCUREMENT POLICY STATEMENT

In accordance with the goal of Azerbaijan State Oil and Industry University "Acting in line with our values through social responsibility and sustainability", the purpose of this policy is to implement university procurement within the framework of social responsibility and environmental sustainability. These include more advanced energy sources, efficient usage of water resources, moving the university towards carbon neutrality or renewable energy production, using renewable materials, eliminating waste, especially hazardous materials, improving the physical environment of the campus, and encouraging staff and the wider community to practice sustainability.

III. KEY PRINCIPLES OF SUSTAINABLE PROCUREMENT POLICY

Within the framework of the main principles of the Sustainable Procurement Policy, university staff should strive to achieve the following:

1. Using the procurement in accordance with the university's values of social responsibility and environmental sustainability;
2. Supporting the policy of the university in this direction by using more renewable materials;
3. Usage more alternative energy sources in order to eliminate greenhouse gas emissions.

Acting rector
